

Synapse Office Protect

Protect your Microsoft 365 data

Flexible backup

Provide different levels of data protection to different sets of users by setting up multiple backup policies per organisation.

Rapid recovery

Minimise downtime and recover in minutes. Easily restore your Office 365 artefacts for sites, libraries, OneDrive, mailboxes, Groups, or Teams.

Compliance

Meet legal and compliance requirements and ensure you recover exactly what you need — no more, no less — with granular advanced search.

Your data. Your responsibility.

Why backup Microsoft 365?

In a survey on 1,000 IT professionals, over 80% experienced data loss in Microsoft 365.

Microsoft employs a *Shared Responsibility Model*.

Sure, Microsoft hosts the infrastructure. But it's your responsibility to protect and back up your business-critical Office 365 data.

Always

Protected and Accessible Data

Microsoft 365 delivers a range of powerful services. Backup of your Office 365 data is not one of them.

Synapse Office Protect eliminates the risk of losing access and control over your Microsoft 365 data.

With this solution, you can securely back up 365 Exchange Online, SharePoint Online, OneDrive for Business and Teams, quickly recover individual items and efficiently perform eDiscovery of data archives.

We make sure data is always available, protected and actively working.

Regardless of where your data resides — in Microsoft Azure, Azure Stack Hub, Azure Stack HCI, Azure Kubernetes Service or Microsoft 365 — we make sure it's available when and where you need it.

Key Features

Granular Restores

On-demand, granular recovery of Office 365 content

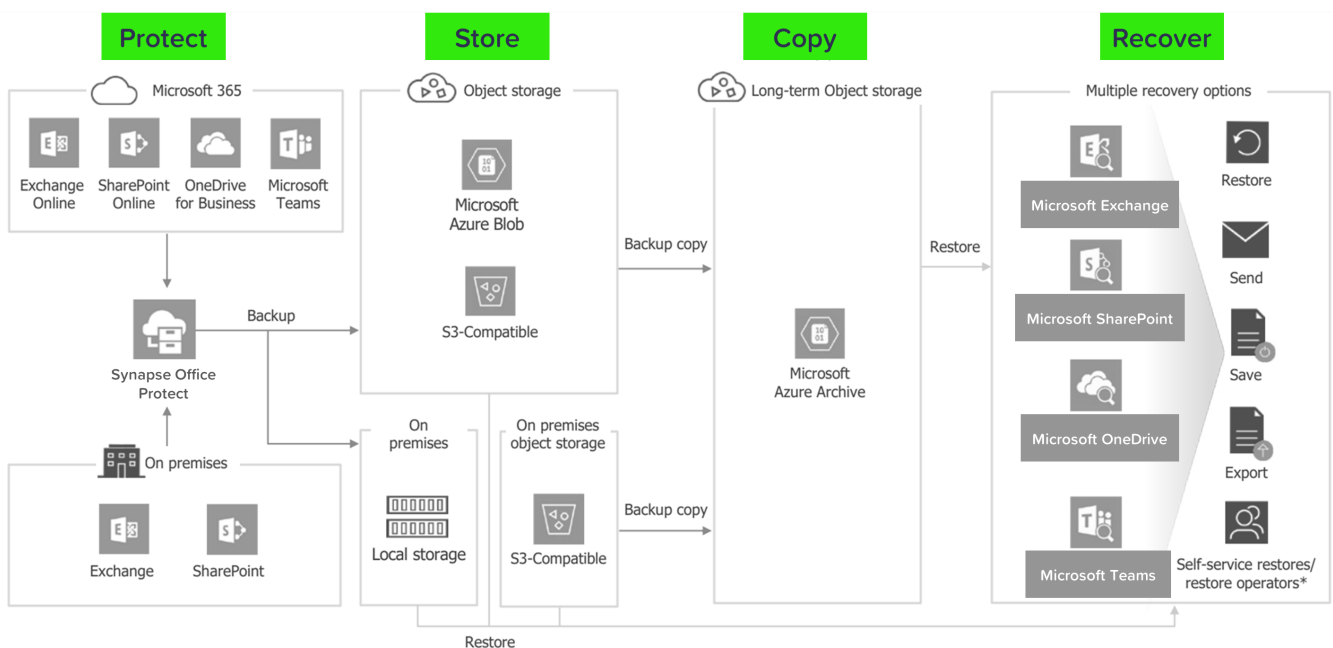

Bring your own Storage

Store backups in your cloud or a data centre of your choice.

Unmatched Scalability

Minimise overhead with a multi-repository, tenant architecture.

Okay, I'm ready to backup M365...
