

University of York

Cloud made simple, unified and scalable

In collaboration with **DELL** Technologies

Predictable,
fixed costs

Scalable to keep
up with demand

Easy system
migration

The Challenge

University of York - a prestigious, dynamic, data-driven Russell Group University - is home to groundbreaking research and education.

From life-saving discoveries to new technologies that tackle the most pressing global challenges, the University must stay up and running at all times.

What do they need from their IT infrastructure?

- **Sustainable, Rapid Disaster Recovery** for high capacity storage in the event of a crisis
- **Zero downtime** or delay
- **Anywhere, anytime:** Staff and students able to quickly access data & services
- **Flexibility** and **Scalability**
- **Future proof** technology

The Solution

After a thorough evaluation, **Synapse360** delivered a predictable, low-cost alternative with Public Cloud like features: Offsite Backup and Disaster Recovery with low recovery times.

University of York benefit from the **Dell PowerScale Storage as a Service solution** and the Synapse360 cost VRS Cloud & other Datacentre costs (Equinix) - **53% cheaper** including all services not just hosting.

72% reduction
in backup time

The Benefits

University of York now benefit from **an all-inclusive scalable solution** made up of Backup, Disaster Recovery, and Cyber Protection.

Our award-winning care team provide the University with instant access to our in-house experts, including engineers and account managers. No raising tickets and waiting for a callback.

'I came in with a fresh pair of eyes, talked to various people, engaged with Synapse360, had a look at the solution and it solved challenges that we just couldn't solve with AWS and Azure'

Dan Bishop, Head of Systems and Cloud Transformation
